Transafix®
Fixing systems

Transafix Eco – for patients with a short length of stay

Quality that pays off

Transafix fixing straps have been used in all areas of care for more than 30 years. Transafix Eco, for patients with a length of stay of up to 48 hours, expands the Transafix fixing strap range with a more cost-effective option.

NEW!

Anaesthesia
Keep everything in place during transfer

Emergency Department
To protect newly placed medical tubing

Intensive Care Unit
For fixation during a short length of stay

Ward
Constantly replacing medical tubing is no longer necessary

Transafix Fixing Straps – an overview

Overview of the benefits:

- ✔ Free movement or secure fixation of the medical tubing in the Velcro strap tab
- ✔ Gentle on the skin, even for sensitive skin
- ✔ Recommended for e.g. PEG tubes, urinary catheters and CAPD
- ✔ Maximum patient comfort
- ✔ Highest quality standard
- ✔ The Velcro strap tab can be opened and closed multiple times
- ✔ Application duration: 5-7 days
