Transaflow®
Syringes

The syringes we offer are compatible with the following injectors – an overview

Whether CT or MRI – the Transaflow® Multi-Patient-Syringe-System for administration of contrast media enables a hygienic, safe, time-saving and resource-efficient working day in radiology. Both the syringes and the Multi-APS Systems are compatible with all standard syringes injectors.

Standardization as well as safety and hygiene in radiology routine

Our Multi-Patient-Syringe-System optimizes contrast medium administration routines. The system consists of our proven 12- or 24-hours Transaflow® Multi-APS-Contrast media-Filling System and the matching 12- or 24-hours syringes. The closed system is complemented by our PWL (straight) and PWLS (spiraled) patient lines in the desired length.

- ✓ **With special drip and clog stop**
- ✓ **Multiple application up to 12/24 hrs**
- ✓ **Certified by the DGKH e.V.**
