# Transatlantic Multisheet

The revolutionary Multisheet is not only used for lifting, carrying and pulling patients weighing up to 150 kg, but is also ideally suited as a waterproof pad (with a capacity of approx. 2.8 liters) and for back-friendly transfers.

## Example of use:

- 1** John had an accident and is bleeding heavily. Immediately, the paramedics put John on the Multisheet and then on the stretcher.

- 2** In the emergency room, John is transferred from the stretcher to the hospital bed with the help of a rollboard and the Multisheet.

- 3** The doctors take care of John and his open wounds. During the entire treatment, the Multisheet remains underneath him.

- 4** John has to get surgery. Only now, the Multisheet is removed, as it must be sterile and clean in the OR.

## ✓ Benefits:

- ✓ Absorbent pad and transfer aid with handles in one product
- ✓ Carrying capacity of up to 150 kg
- ✓ Holds up to 2.8 litres of liquid
- ✓ Safe and stable thanks to 4 handles on both sides
- ✓ Can be used alone or together with our Transaroll boards
- ✓ Fast and clean use
- ✓ Single-use product
