Static Radiology Products

The ideal aids for facilitating x-rays

Innovative solutions which noticeably relieve the burden of patients and health care professionals.

X-Ray Mat, Blue

The Transatlantic X-Ray mat has been specially developed for the table-top transfer and safe positioning of patients during the X-Ray process.

Item No. 4500019 (85 cm wide)
Item No. 4500020 (60 cm wide)

Transatlantic X-Ray Case and Protective Film (Set)

Thanks to the innovative conception of the sliding X-Ray case, the X-Ray cassette can be simply pushed underneath the patient.

Item No. 4500011

Specialist Transfer Aids

These specialised supplies for the transfer of obese patients can be used in conjunction with our Rollboards.

Ideal for rescue operations, paramedics and hospitals!

XXL-Carry Sheet

The revolutionary Carry Sheet XXL serves not only to hoist, carry and extract those injured in accidents who weigh up to 450kg, but also as a water-tight support (up to 4 litres of fluid) and a back-friendly option for professionals during patient transfer.

Item No. 4700081

Sitting-Down Transfers

The Transatlantic Glide Boards serve to transfer and relocate patients, for example from the edge of their bed into the wheelchair, onto the toilet, or into the car.

Transatlantic Silver Gliders – the newest generation of Glide Boards!

Silver Glider M

The Silver Gliders M and L have been developed by experienced practitioners and proven reliable and effective for many years. The Glide Boards' smooth surface minimises frictional resistance, whilst the anti-slip seat prevents the patient from sliding off the board during their transfer.

Item No. 4500414 (68 cm long)

Silver Glider L

Item No. 4500415 (85 cm long)

Sit-On Sliding Cover

Item No. 4410521

Glide Board with Rotating Disc, Beasy Trans

Preventing shear and frictional forces, the Beasy models can be used to seat your patients safely on the transfer disk, which glides and rotates with the same level of ease even under heavier loads.

Item No. 4411102
